Leslie—Light delicate pink with rich crimson maroon blotches, pointed white	1 50	10 00	90 00
Melrose—White flaked pink, bright crimson center. Very large and fine	1 00	7 00	60 00
Mrs Frank Pendleton—Awarded Certificates of Merit by the Massachusetts Horicultural Society at Boston, August 1909, and American Gladiolus Society at Baltimore, August 1911. The flowers are very large and well expanded, of a lovely flushed salmon-pink with brilliant carmine or deep blood red blotches in the throat, presenting a vivid contrast of orchid-like attractiveness. It is of the Lemoinei type in form, and color effect, and Mr. Kunderd, the originator, seems to have given it a gandavensis stem so that it takes up water freely and opens up perfectly nearly every flower after being cut and placed in water	1 50	10 00	90 00
Niagara—In type the variety resembles "America," but the flowers appear to be somewhat larger, measuring 4½ inches across. In color the flowers are of a delightful cream shade with the two lower inside petals or segments blending to canary yellow. The throat is splashed with carmine, and the lower ends of the outside petals are also blushed with carmine. The stamens are purple and the stigmas pale carmine, this little addition in the coloring relieving the creamy effect of the petals. The flower spike is very erect and stout and is wrapped with broad, dark green foliage. The variety is evidently destined to lead in the cream colored varieties, in fact it would seem to be in a closs all by itself	1 00	7 00	60 00
Negerfurst—Very dark blood black, with velvety black spots, inflamed with white and flaked lilac-rose. A very odd, beautiful color, long graceful spike and robust free habit. Best of the dark varieties	3 50	25 00	200 00
Richred—Tall and handsome spikes with good size flowers of good form, and a rich deep blood red color	1 50	10 00	90 00
Rose Wells—Large wide open blooms; light rose, clear color with small attractive blotch of lilac rose and yellowish green. Tall branching spike. Very good	1 50	10 00	90 00

Scribe—A beautiful, large, well-opened flower and an enormous spike. Color like the fine old Eugene Scribe, tinted white, freely striped carmine	60	4 00	35 00
Sulphur King—This is by all odds the most valuable yellow variety ever introduced. It produces a very long spike of the clearest sulphur yellow flowers yet seen in any Gladiolus. As it becomes known there will be a great demand for it, as it fills the need for a sterling yellow variety. Awarded a "Certificate of Merit" in Holland in 1912 and 1913	1 50	12 00	100 00
Silvretta—Creamy white with carmine blotches on lower petals, spike strong and tall. Blooms later than most sorts	3 00	20 00

Viola—A very large Lemoinei type flower of exquisite mauve blue, gradually shading deeper to rich violet at the edges; throat toned soft canary with purple-garnet blotch zoned yellow in lower petals	1 50	10 00	90 00
White Glory—A gorgeous pure white of exact size and type of Kunderdi Glory, with beautiful iris blue throat. Fine as a delicate iris. Grand	7 00	50 00

Niagara—Ch. Banning—In type the variety resembles "America," but the flowers appear to be somewhat larger, measuring 4½ inches across. In color the flowers are a delightful cream shade with the two lower inside petals or segments blending to canary yellow. The throat is splashed with carmine, and the lower ends of the outside petals are also blushed with carmine. The stamens are purple and the stigmas pale carmine, this little addition in the coloring relieving the creamy effect of the petals. The flower spike is very erect and stout and is wrapped with broad, dark green foliage. The variety is evidently destined to lead in the cream colored varieties, in fact it would seem to be in a class all by itself	1 00	7 00	60 00

Gladioli in Mixtures.

We build our mixtures to order, as we believe this is the only way a true mixture can be kept up to standard. We know perfectly well that mixtures can be bought at almost any price, but after testing most mixtures on the market we have come to the conclusion that our customers want and should have something better than the average. So we build our mixtures from named varieties and seedlings of merit.

Regarding our mixtures under color, we are most careful to have them true and pure, in fact, as well as in name; and they are mixed with great care from named sorts.

OUR GUARANTY

We are so very anxious to give our customers satisfaction, and we are so very sure that we have satisfactory goods, that we stand ready to "make good" by replacing anything that does not turn out as represented, from any fault of ours.

OUR PRICES

We plan our prices to cover cost of production and cost of handling and selling which items have advanced considerably during the past five years in keeping with all other products.

In view of this we have been obliged to advance prices in some cases from time to time. We never lower the standard of bulbs, not even to meet competition.

LYCORIS SQUAMIGERA

or

AMARYLLIS HALLII

A perfectly hardy Amaryllis producing beautiful pink flowers.

Description—Lycoris Squamigera produces in early spring attractive green foliage which grows until July when it ripens off and disappears, and one not familiar with its habits would think the bulb had died, but about a month later as if by magic the flower stalks spring from the ground to a height of two or three feet, developing an umbel of large and beautiful lily-shaped flowers 3 to 4 inches across and from 8 to 12 in number, of a delicate lilac pink shaded with clear blue.

Culture—As the bulb is perfectly hardy without any protection it can be planted either in the Fall or Spring but we consider Fall the best time as the bulbs will have a chance to get established before flowering time. Cover the crown about 4 inches. Very useful for the border or among shrubbery.

Price for strong blooming bulbs $1.00 Per doz., $7.50 per 100. $70.00 per 1000.
